

MINERAL ENGINEERING TECHNICAL SERVICES

Delivering quality engineering consulting services
and project management expertise
through innovation and attention to detail.

MINERAL PROCESSING

A WEALTH OF MINERAL PROCESSING EXPERTISE

Mineral processing is our core speciality. We offer a range of testwork programs and engineering studies to assist in any stage of your project including:

- Sighter testwork
- Conceptual/scoping studies
- Testwork programme management
- Interpreting testwork results
- Feasibility studies (FS)
- Pre-feasibility studies (PFS)

ENGINEERING DESIGN

INNOVATIVE SOLUTIONS

Our particular expertise lies in multi-discipline design and plant layout. We can find specialised solutions for your project, including:

- Piping
- Engineering studies
- Mechanical design
- Civil & structural design
- Instrument & control design
- Equipment design, specification & selection

TRAINING

BROADEN YOUR TECHNICAL KNOWLEDGE

To boost your technical awareness and practical expertise we provide customised and in-house training courses. The extensive range of courses includes a variety of mineral processing methods, safety, risk assessment, metallurgical accounting, water management, engineering and design topics, and many more. We can design and tailor any course to meet your unique requirements.

METS can also assist in creating, re-writing and updating your operations training manuals. All of our services can be delivered with site placed trainers if required.

SPECIALIST SERVICES

TAP INTO A TEAM WITH DECADES OF EXPERIENCE

You can count on our expert consulting services to offer unbiased reviews and advice. Our specialist services to the international mining industry cover:

- Skills hire
- Operational services
- Due diligence
- Expert witness work
- Environmental services
- Dust management
- Consulting
- Water and waste water management
- Risk management

PROJECTS

EXTENSIVE PROJECT EXPERIENCE

METS provides outstanding services to customers through an unrelenting commitment to excellence. Our engineers are able to complete jobs on time, on budget and above the expectation of our clients. A selection of our recent projects include:

- Brockmann Resources Pty Ltd - Marillana Project - Front End Engineering Design
- POSCO E&C - Roy Hill Iron Ore Project - Total engineering design verification
- Troy Resources NL - Casposo Project - Feasibility study, procurement and commissioning
- National Iranian Copper Industries Co - Sungun Project - Metallurgical review
- Cominco S.A. - Hinda Uranium Phospet Project - Metallurgical testwork

ABOUT US

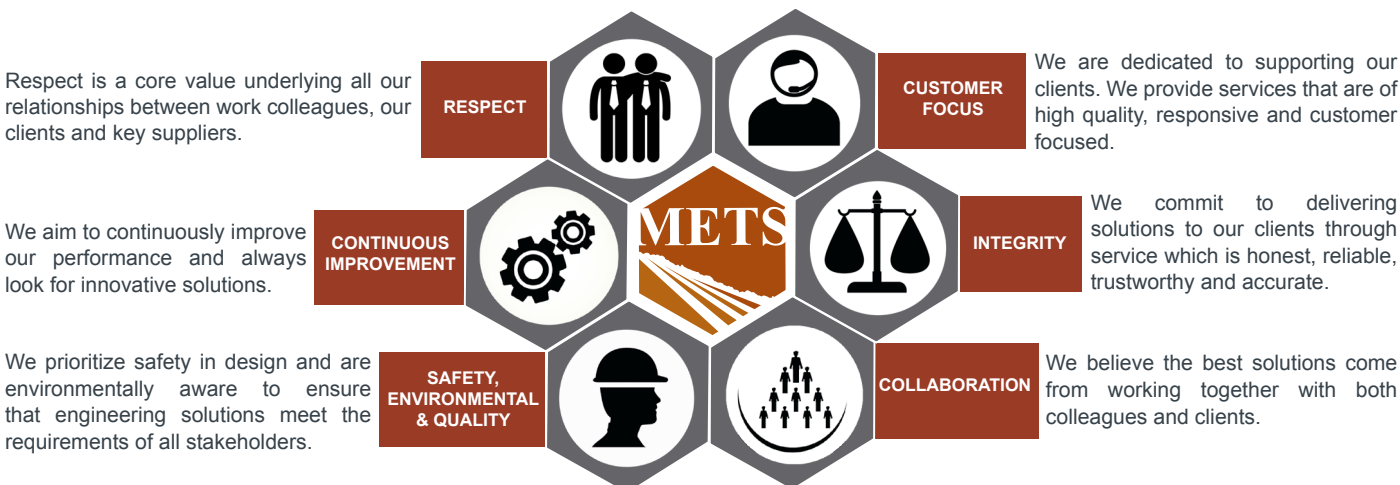

Mineral Engineering Technical Services (METS) is an independent specialist consultancy providing services to the global mining industry. Our professional staff are available to help on any job in Australia and overseas.

Since 1988, METS has established itself as a quality service provider. METS is aptly skilled to provide comprehensive services in mineral processing, engineering design, training and specialist services. Our core business is founded in establishing long-term relationships with our clients enabling us to draw upon our historical

knowledge of specific project operation to derive the best possible outcomes. Our core purpose is to make economic resource projects more robust and to make robust projects realise their full potential.

METS is a division of Midas Engineering Group, comprising CDMS Consulting Engineers, Wilkie Civil Engineering, Sanderson Consultants and TCT Electrical Engineering. Together we provide a wide range of quality engineering services across numerous disciplines and industries.
